

Razorpay Landing Page Clone

Project Overview

This project is a clone of the Razorpay landing page, a renowned payment gateway service. The goal is to replicate the design and layout using HTML, CSS, and the Tailwind CSS framework. The clone provides a responsive and visually appealing version of the Razorpay landing page, suitable for showcasing your web development skills or as a starting point for further customization.

Description

Razorpay is a widely used payment gateway that enables businesses to manage online transactions seamlessly. This landing page clone offers a hands-on approach to understanding and implementing the design principles of such platforms. With a clean and organized codebase, the project serves as an excellent resource for learning and practicing web development.

Technologies Used

- **HTML:** The foundation for structuring the content of the landing page.
- **CSS:** Used for styling and layout customization.
- **Tailwind CSS:** A utility-first CSS framework that streamlines the styling process, making the code more efficient and maintainable.

Features

- **Responsive Design:** Ensures a consistent user experience across various devices and screen sizes.
- **Tailwind CSS:** Leverages the power of Tailwind for rapid and efficient styling.
- **Clean Code:** Follows best practices for HTML and CSS, promoting readability and maintainability.

How to Use

To view the Razorpay Landing Page Clone locally, follow these steps:

1. Clone the repository:

```
git clone https://github.com/abhinay-kumar47/Razorpay_landing_page_clone.git
```

2. Open the project folder:

```
cd razorpay-landing-page-clone
```

3. Open `index.html` in your preferred browser.

Contributing

If you'd like to contribute to this project, follow these steps:

1. Fork the repository.

2. Create a new branch for your feature: `git checkout -b feature-name`

3. Commit your changes: `git commit -m 'Add some feature'`

4. Push to the branch: `git push origin feature-name`

5. Submit a pull request.
